[Closing the Gap on Forestry Management Measures-v2c 1.7.15 clean.docx](#)

Apologies to all, but please use this version moving forward. The previous version I just sent around missed a few touch-ups. Thanks.

Thanks, Jenny. That was quick!

This version provides additional clean-up and formatting for ease of reading and re-inserts some text (in the form of a comment box) that Steve Sweeney and I would like considered. See p. 2 near the top (Riparian Buffers for Small Non-Fish Bearing Streams). It also fixes a misspelling ("explicity" → "explicitly").

Please use this version for any final touch-ups.

Don

Hi Everyone, I took Don's latest version and also reformatted so that there's some consistency in the bullets. I've highlighted in yellow the areas that we'd include if NMFS were to buy off on these actions being helpful for coho recovery. I think Christine, you'd indicated that if NOAA gives the thumbs up on the language, we keep it. Otherwise, NOAA can make the call on whether to change or strike the language.

Christine, this version includes comments from Steve, Dave, Don, Allison, Alan, and me. Look at the clean version for easier reading.

All,

Here's a clean version, as promised. I left a couple of comments in that still may need to be addressed (...heads-up, Jenny!) This version was created by accepting all changes and cleaning up the formatting. Once I did this, I discovered a few spots where obvious word edits were needed, so I made those, as well.

All,

I have added a few edits to Allison's version, as well. I also tried to reconcile Steve Sweeney's edits/comments (which he made to the original version and sent only to the tech team) to the current version. So the attached version includes edits and comments from:

Alan, Allison, Steve & me. (Am I leaving anyone out?)

I think the next step is to come up with a clean, nicely formatted version and ensure that all comments have been addressed. I can do that tomorrow morning, if needed (...will touch base with Allison in the morning).

Christine--

Thanks for taking the lead on this. My comments/suggested edits are attached for your consideration. I added track changes to a version Alan already had made some changes to to make sure statements in this summary aligned with statements in the decision doc. Most of my comments and changes were made along the same lines--to ensure consistency with current lang. used in the decision document. I think that is important and something I know Jeff has focused on during his legal reviews as well.

As a general comment, I know our goal is something short and sweet but we may want to consider reformatting our options as a list of bullets rather than as an in-paragraph list to improve readability. I found it a little difficult to read a long list of recommendations in paragraph form.

I have shared with NMFS and will let you know if I hear back from them in time for the 10:00am PST deadline. Otherwise, we may need to say these are some preliminary thoughts pending further discussion with NMFS.

Allison

I think we have what we need to work with but I need your help to refine it. The two documents that I think we use to put together the draft that we would share with the state are attached. I will be working on them this morning to come up with a version that includes some greater specificity on milestone which I will then want you all, particularly Allison (and NMFS contact), Alan and Jenny, to quickly look at and let me know if it meets our needs/expectations.

Things are moving very quickly now and we need to get this done ASAP. I can fill you in more completely on our call tomorrow.
